

Introducing LiDCOview^{SE}

NEW

The easy way to review LiDCOplus and LiDCOrapid data:

LiDCOview Standard Edition (SE) is designed as a graphical display of historical LiDCOplus and LiDCOrapid hemodynamic data. LiDCOview^{SE} provides the clinical researcher with easy to view beat-to-beat hemodynamic data that was collected with the LiDCOplus and LiDCOrapid.

Key Benefits:

- Research
- Audit
- Training
- Case Study

Key Features of LiDCOview^{SE}

- Easy to view graphic display of hemodynamic data
- Simple Navigation: zoom from 2min to 24hr with Calibration, Event and CVP flags displayed
- Data selection for numeric values and analysis
- Numeric values - includes dynamic preload response values: SVV and PPV
- Printing or screen shot for inclusion in papers and presentations
- On screen help
- Indexed values and real-time stamp with LiDCOplus Version 4 software

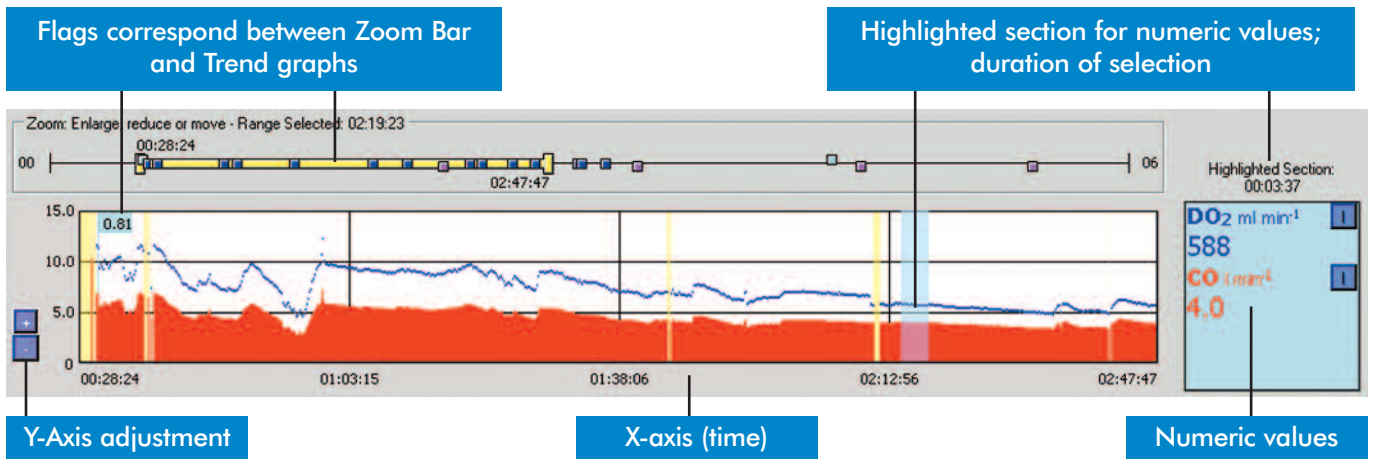

LiDCOview^{SE} is intended for review of historical data for research and education. It is **not** intended for use in the diagnosis of disease or other conditions.

Navigation Controls:

Overview and Zoom Bars make finding data easy.

Hemodynamic Data is displayed as a Trend.
Highlight a selection to see the specific numeric values.

LiDCOview^{SE} will run on the following Windows operating systems: NT, 2000sp3, XPsp2 and in 32 bit mode in Vista and 7. It requires Windows Installer and Internet Explorer 5.1. LiDCOview^{SE} runs inside the Windows .Net 2.0 run-time environment, which requires 280Mb of hard disk space. LiDCOview^{SE} uses the heart beat data file (*.HBD, Version 3) or the lidcoview (*.LVU, Version 4) available from the LiDCOplus or LiDCOrapid Engineering Screen.

LiDCOview^{PRO}

with even more features including:

- Advanced Navigation and Information Display
- Display: LiDCO Curves, Cal and Event History
- Analysis and Reporting
- Multiple File Display
- Graphics and Excel Exporting
